

The original bathing and skin cleansing breakthrough

BagBath®

BagBath is the original American-developed no-rinse disposable bathing system that replaces the traditional soap & water bed bath.

BagBath significantly:

- Reduces the costs of bed bathing
- Improves skin condition
- Saves nurses and caregivers time
- Increases patient comfort & dignity

In 1994, acute care nurse Susan Skewers, RN, developed BagBath and revolutionized bathing procedures for patients in nursing facilities, acute care and home environments. BagBath's unique ingredients gently remove bacteria while securing the acid mantle of the skin, preventing dryness and scaling.

Why Choose BagBath?

- Non-perfumed rayon cloths tenderly collect dirt and soothe skin
- Clean, non-ionic water ensures mildness
- Vitamins B5 and E moisturize skin
- Cloths can be warmed or cooled
- Decreases bathing time by half
- Ingredients include an FDA-approved skin and wound cleanser F-68
- Produced by GMPC hygiene standards in a sterile environment

BagBath®

How is a BagBath used?

- Cool or warm in a BagBath Warmer or microwave
- Use one cloth per body area, referring to BagBath instructions, to prevent cross-contamination
- Separate cloths are provided for face, legs, arms, back and perineum
- No rinsing necessary

BagBath Accessories

BagBath HairCare

Our HairCare completes a bed bath without the use of water.

Simply massage into hair and towel dry.

BagBath Warmer

Standard warmer holds 30 BagBaths

Small warmer holds 10 BagBaths

UL & CUL Listed

BagBath

*BagBaths packs contain 8 cloths.
